## Spacecon Receives National Safety Awards

### SAFETY HIGHLIGHTS

“Whatever it Takes,” declared Jesus Valadez, Safety Director for Spacecon.

Read more on Spacecon’s Safety Philosophy on Page 3.

### 2nd Qtr Activities

- OSHA 30 Hour
- OSHA 10 Hour

Spacecon has a long history of high standards for safety and was recently awarded the prestigious Safety Training and Evaluation Process (STEP) national award from the Associated Builders and Contractors, Inc. (ABC) in both the West and East locations.

Spacecon West received the STEP Award for its Gold Level of achievement from the ABC Rocky Mountain Chapter.

Spacecon East was recognized with the impressive Diamond Level of achievement from the ABC Delaware Chapter.

recognized for the STEP Award which was created by contractors to assess and develop vital safety programs since 1989. This award highlights companies that execute safety practices on job sites and make Safety paramount within their firm.

## “Name the Newsletter” Contest!

*We need your help putting a name to our Spacecon Newsletter!*

Last quarter we introduced our brand new Spacecon Newsletter to you. Now it’s time to give it a name! “We want your ideas as we continue to grow and communicate with our Spacecon family,” announced Robert Yelinski, Spacecon Region President. “This can be a slogan, a phrase, a sentence or anything in between that reminds you of Spacecon.”

“We encourage all employees and their families to submit ideas by September 1, 2017,” said Yelinski. “There will be a Grand Prize for the person with the winning entry. The winner will be announced in our fourth quarter Newsletter.”

*(Please submit all suggestions on paper to your foreman or superintendent, or e-mail Belinda Seale at [bseale@spacecon.com](mailto:bseale@spacecon.com) in the West or Nora Weder at [nweder@spacecon.com](mailto:nweder@spacecon.com) in the East. Be sure to include your name and phone number!)*

## Employee Spotlight

Spacecon considers our employees the cornerstone of our success. We would like to recognize two valuable members of our team this quarter, Joe Hutchison and Joe Scalora.

**Joe Hutchison** resides on the East Coast and is the Foreman currently serving on the Incyte project. Joe joined Spacecon in December of 2000.

“Joe (Hutch) is extremely organized and always motivates his crew to get behind him to complete the most difficult jobs,” said Donovan Wierzbicki, Field Operations Manager for the East. “He has always worked within a tight schedule and this project has been very challenging. Joe has kept a clear focus and is keeping to the schedule just fine.”

**Joe Scalora** is from the West and serves as General Superintendent for Spacecon’s Prescient projects across the country. Prescient, a Denver-based manufacturing and technology company, fabricates components to construct buildings. Prescient’s system is revolutionizing the construction industry with their approach to a pre-fabricated framing system that is installed on the job site.

“Spacecon installs each and every piece from start to finish,” stated Joe Scalora. “Every piece and every part has a number and correlates with the scope of work from our customer. “Our committed team works together to arrange our traveling crew and their accommodations, the transportation of all of the Prescient components, and all of our equipment and tools needed to install and construct the building.”

## EXPLORING SPACECON’S SAFETY VALUES

“Whatever it takes to bring everyone back home safely and in one piece with 10 fingers and 10 toes,” explained Jesus Valadez, Safety Director for Spacecon West.

“Our main responsibility is to bring our employees home nice and safe to their families. Sure, they may be a little tired and a little sweaty, but we work hard on a daily basis to ensure the health, welfare, and safety of our employees,” said Valadez. “We extend this philosophy to our entire workforce, including our subcontractors because our support and training from Senior Management is central to the core of our success.”

Spacecon has always incorporated daily safety measures to ensure the best and safest work days. The Task Safety Analysis (TSA), which every employee is required to complete at the start of each day, is an inspection of the work site to promote awareness of the job and review any possible hazards that could arise.

The Stretch and Flex Program is a morning routine conducted to help employees stretch and strengthen specific muscles and avoid injuries.

Together, Spacecon and its employees work together to achieve the safest environment possible all day, every day.

## Coming Soon!! Spacecon’s Facebook Page

**Coming Soon!** A new way to communicate with and follow Spacecon on Facebook! “We want to connect with our employees and their families, as well as our customers and vendors through social media,” declared Robert Yelinski, Spacecon Region President. “Our newly revised Facebook page and presence will give us the first step to accomplish this effort. We will be able to highlight our people and our projects in a more timely fashion.”
