“Thank you for your continued dedication. We recognize and celebrate our employees years of service to Spacecon. Congratulations!”

- Robert Yelinski

Spacecon Region
President

Let's get social...

Take photos of your jobsite, co-workers, and events for work! Then email them, along with a blurb about the photo, to nyelinski@spacecon.com.

Next, like us on Facebook and follow us on Instagram to see your photos!

SPACECON Quarterly Measure

VOLUME 4, ISSUE 3

SEPTEMBER 29, 2020

In this Issue

- National Safety Week
- Anschutz Health Sciences Building
- Spacecon Gives Back
- Employee Service Awards
- Employee Spotlight

National Safety Week

We stand down for National Safety Week, this year it was held September 14-18th. Together, we are building a stronger, safer industry.

Safety Week initially started in 2014, when more than 40 national and global construction firms comprising the Construction Industry Safety Initiative (CISI) group and the Incident and Injury Free (IIF) CEO Forum joined forces with a single aim: to inspire everyone in the industry to be leaders in safety.

Every day, as we walk onto our construction sites we have one goal in mind – get the job done safely. We take great pride in the role we play shaping the communities in which we live, work and play. But even more than that, we feel an unwavering responsibility to one another, our families and friends to make sure we all return home safe every day.

In our industry, safety is a value and belief we all share. That is why more than 70 national and global construction firms join forces for Safety Week with a single aim: to inspire everyone in the industry to be leaders in safety.

Safety Week is a show of force, an opportunity for people, companies, and even competitors, to work together and celebrate the incredibly hard work by people in our industry who make safety the foundation of everything they do.

Let's look at some history in regards to safety week:

In 2016, Safety Week was more formally branded and started to take shape as the fully integrated annual campaign with a growing number of members and sponsors that exists today. We continue to focus on the original mission of:

Thanking workers for supporting safety and recognizing their efforts to be injury free

Increasing awareness of the importance of being committed to safety, every day

Encouraging everyone to share best practices and to work together to strengthen the industry's safety culture

Conducting on-site safety awareness activities to support education

National Safety Week

“Safety is a core value, we strive to complete every task, and ultimately every project with zero accidents. “Safety first” is how each one of our employees is able to make it home at the end of the day.” President Bob Yelinski. Through hard work, dedication, and compassion for one another we continue to lead with safety.

This year each jobsite took to safety week in their own way.

221 Mountain Ave reviewed their daily toolbox talk, while maintaining their physical distancing. CYSO6 had an ARC flash demo.

Spacecon gives back!

Each year we participate in a variety of opportunities to support our community.

This year we donated school supplies to help local charities up and down the front range.

Anschutz Health and Sciences Building

The Anschutz Health Sciences Building at the University of Colorado Anschutz Medical Campus will be an integral and dynamic focal point of the Campus, furthering its trajectory as one of the leading medical care, research, and education facilities in the world.

The building program supports multiple users, including researchers, faculty and staff, students and patients, and includes facilities for computational research and clinical trials, an educational medical simulation hub, mental/behavioral health research clinics, faculty offices

and other educational and amenity spaces to be shared by the campus.

The building's sculptural form takes its cues from the carved mass of the surrounding mountains and canyons integral to Colorado's regional identity and is expressed as a rich layering of plateaus and faces in the crystalline exterior palette of metal and glass. The exterior architecture vernacular extends into the interior spaces, creating moments for occupants to interact between the interior and exterior environments with ledges and terraces that allow access to the outdoors and Colorado landscape views.

A sky lit atrium welcomes the outside into the building and serves as a central gathering space, promoting connection and collaboration across the multiple floors, and to the rest of campus. Occupant wellness is supported through biophilia strategies, including daylight spaces, landscape views and native Colorado plants to create healing environments.

The exterior architecture vernacular extends into the interior spaces, creating moments for occupants to interact between the interior and exterior environments with ledges and terraces that allow access to the outdoors and Colorado landscape views.

The project is scheduled for completion in 2021.

Currently top and bottom track is being installed on Level 6. The team is installing studs on Level 5 and next week soffits are scheduled to be installed within the courtyard.
