RE: State of Wyoming OSHA Cowboy Star VPP Award

Dear Scott,

On behalf of Clayco, we are writing to convey our sincere gratitude for your partnership in achieving a historic safety milestone together. Just recently, Clayco was recognized by Wyoming OSHA and received the state's first ever Cowboy Star Volunteer Protection Program (VPP) issued to a mobile workforce for our collective work in Cheyenne on a confidential hyperscale data center campus. We are quite pleased to share this recognition with you, and are writing to express our thankfulness to your team's participation and cooperation in that award.

Together, we are all beneficiaries of a positive, proactive safety culture that strives to improve the work environment and well-being of all people who contribute to our industry. Please share our gratitude with your entire team.

Finally, and most importantly, please continue to share your ideas on how we, collectively, can advance the safety and well-being of all men and women contributing to the success of our industry across all project sites.

Sincerely,

Bob Clark
